

Atascosa County Child Safe Program

Presented by
Atascosa County
Constable Pct. 4

**John A. Rutherford
Atascosa County Constable Precinct 4
744 Highway 281 South, Pleasanton, TX 78064
Phone 830-569-6614**

Dear Parent or Guardian,

Prevention and Preparation are important steps in protecting our children. This kit is provided to give you the knowledge and tools in not only averting crimes against children, but laying the groundwork for cooperation in case of a missing child.

Included are prevention tips from the National Center on Missing and Exploited Children, a leading organization that works on these issues. In addition, please ensure that all information that you record here— photos, a DNA swab, medical information, distinguishing marks— are updated at least yearly. Keep a separate record for each child and place this information in a safe, 24-hour, easily accessible place should the unthinkable happen. Your recording of this information today will be essential in the recovery and identification of a child.

Let's work together to promote safe and responsible communities!

Sincerely,

John A. Rutherford
Atascosa County Constable Precinct 4

This is not a record maintained by the Constable's Office.

Basic Information

Child's Last Name

Note: Atascosa County Constable's Office is not responsible for fingerprint quality.
Nota: La Oficina del Alguacil del Condado de Atascosa no es responsable de la calidad de las huellas dactilares.

Fingerprints should be updated every few years. While a child's fingerprints never change, their fingers become larger as they grow, making fingerprints easier to read.

Las huellas dactilares deben actualizarse cada pocos años. Si bien las huellas dactilares de un niño nunca cambian, sus dedos se agrandan a medida

Photographs

Date photograph was taken _____
Fecha en que se tomó la fotografía

- Photographs must be at least 2" x 2"
- Las fotografías deben ser al menos 2" X 2"

Parents should update the photographs every year. Take photographs as the child normally looks. For children under the age of 2, the photos should be updated every 4 months.

Los padres deben actualizar las fotografías cada año. Tome fotografías como el niño se ve normalmente. Para los niños menores de 2 años, las fotos deben actualizarse cada 4 meses.

DNA Sample

Parents may also wish to include a swab of the inside of the child's cheek which can be used for DNA testing. To collect the DNA sample, take oral swab or Q-tip and rub the inside of the child's cheek until moist. Place the oral swab in a paper envelope and attach to this page writing the date the sample was taken.

Los padres también pueden desear incluir un hisopo del interior de la mejilla del niño que se puede usar para pruebas de DNA. Para recolectar la muestra de DNA, tome un hisopo oral o Q-tip y frote el interior de la mejilla del niño hasta que esté húmedo. Coloque el hisopo oral en un sobre de papel y adjúntelo a esta página escribiendo la fecha en que se tomó la muestra.

Attach DNA sample here
Adjunte la muestra de DNA aquí.
